EXPERIENCE

ENMAX Corporation

January 2026 – Present

UX Design Co-op Student

Calgary, AB

- Established a standardized design system that improved cross-team alignment, reduced UX debt, and enabled faster iteration across multiple ENMAX digital products using Figma MCP, GitHub Copilot, and Claude to increase documentation efficiency by 10x.
- Achieved full WCAG AA contrast compliance across ENMAX design system through comprehensive component audit and rebuild, introducing dark mode as an accessibility feature.
- Positioned ENMAX's digital products for compliance with emerging Canadian accessibility regulations, reinforcing brand credibility and user trust across digital touchpoints.
- Designed a solar education page on enmax.com for Alberta's competitive energy market, translating customer feedback into installation guidance and driving conversions to ENMAX's vetted installer portal.
- Conducted user research for regulated power services, surfacing insights that informed enmax.com form design.

Avid Learner Inc.

October 2025 – January 2026

Digital Experience Designer

Remote

- Developed a branded content design system and rolling planning calendar, standardizing templates, posting cadences, and content objectives into a scalable, handoff-ready system for company leadership.
- Designed social media and email templates alongside structured member portal content architecture, establishing consistent visual identity and a high-value onboarding experience.
- Implemented Google Analytics across Avid Learner's website and built a recurring month-over-month analytics reporting template, enabling data-informed content decisions.
- Converted Avid Learner's Instagram to a business account and established a branded content presence on LinkedIn, expanding the organization's digital reach across platforms.

EDUCATION

Southern Alberta Institute of Technology (SAIT)

2024 – 2026

Diploma, User Experience/User Interface Design

Calgary, AB

- GPA: 3.83/4.0**
- Relevant Coursework:** Advanced User Experience, Interaction Design, User Research, Advanced Visual Design, Product Management, Technical Communications.

PROJECTS

Trumi - Growth That Feels Like You

January 2026 - April 2026

- Led end-to-end UX and product design for a live-deployed self-growth app, from a 34-participant research study and brand identity to a shipped React prototype featuring values-based onboarding, an AI chatbot (Groq), and a layered character customization system.
- Directed all front-end implementations without a coding background by using Claude and Figma MCP as a design-to-code pipeline, personally owning full delivery from Figma to production.
- Translated user research revealing guilt and pressure as the primary barriers to goal-tracking into a guilt-free emotional design system, a deliberate product POV embedded at every touchpoint.

TECHNOLOGIES & SKILLS

- Technologies:** Figma, Figma MCP, Figma Make, GitHub Copilot, Claude, Claude Code, Google Workspace, Microsoft 365, Adobe Creative Suite, HTML5, CSS3.
- Skills:** UX/UI Design, AI-Assisted Design Workflows, User Research, Design Thinking, Usability Heuristics, Product Thinking, User Testing, Prototyping.
